Hi, I am **David,**

Product-minded Software Engineer

PRODUCT MANAGER / PRODUCT OWNER / TECHNICAL PRODUCT MANAGER

Frontend engineer and former UI team lead with **7 years of experience building user-facing applications.** I connect user needs with technical delivery through work with product managers, designers and engineers. My experience spans **team prioritisation, evaluating UI proposals and interim Scrum leadership.** I also take independent products from scope and user flows to launch.

Software Engineer | Emplifi

July 2025 - June 2026

Rebuilt and scaled core React and TypeScript UI components and upgraded Storybook. Collaborated with product designers on implementation and ran **HTML/CSS/React workshops.** During a management gap, served as **interim Scrum Team Lead,** facilitating agile ceremonies and management reporting.

Selected personal projects

Kultomat

Built and launched a **Prague cinema discovery product.** Defined scope, user flows and delivery milestones; shipped public browsing for classic films with automated programme collection.

www.kultomat.cz

AI Audit Toolkit

Created reusable audit workflows for Claude Code and Codex, with consistent evidence standards and reporting.

Education

Charles University

MA, Journalism | 2014 - 2017
BA, Journalism | 2011 - 2014

UI Engineer / Team Lead | Socialbakers & Emplifi

October 2019 - June 2025

Helped initiate design system work, building reusable React UI components, shared design tokens and frontend styling architecture. As senior member of a **three-person UI team, independently set work priorities** and coordinated requests with product managers, designers and technical owners. Decided which UI proposals to take on with designers and engineers, weighing **user benefit, technical feasibility and team capacity.** When available, used UX research findings and metrics shared by designers to inform those discussions. Integrated components into core product frontends.
